Revised Question 74:   There is a document we cannot locate, and it does not appear to be in the library, specifically no Flight Safety Data Package for the Sounding Rocket Operations at other Ranges. Detailed info below:

From RTO Activity #1 -----Sounding Rocket Operations at other Ranges

"No Operational Support. Pre-mission support includes development of Ground and Flight Risk Analysis Reports, Ground and Flight Safety Data Packages and Wind Weighting Data Packages (WWDP). See documents in the bidder's library under the header "White Sands"."

The only documents in the bidders library for this are:

White Sands GSDP -Improved Orion Ground Safety Data Package

White Sands RAR - Improved Orion Ground Safety Risk Analysis Report

White Sands WWDP-Improved Orion Wind Weighting Data Package

There is no Flight Safety Data Package in the Technical Library.

Revised Response: RTO section "From RTO Activity #1 ------ Sounding Rocket Operations at other Ranges" will be revised as follows: "No Operational Support. Pre-mission support includes review of the standardized Ground Safety Risk Analysis Report (making any changes necessary pertaining to the specific mission), development of a Flight Safety Risk Analysis, and development of a Ground Safety Data Package for each launch vehicle. Flight Safety pre-mission support also includes development of the Wind Weighting Data Package for each sounding rocket which fly without a flight termination system. A Flight Safety Data Package (FSDP) is NOT typically prepared or provided unless specifically asked for by the Range. For purposes of responding to this RTO, assume that NO FSDP (other than the Wind Weighting Data Package) is being prepared. See documents in the bidder's library under the header "White Sands"."

Please see technical library for associated changes to document names and addition of Ground Safety Risk Analysis Report.
